Need for reform of research assessment

- To reflect **evolving research processes**
 - ✓ Digital transition; Iterative and recursive; Collaborative and open
- To reflect **increasing demands on research**
 - ✓ Societal, environmental, economic challenges; Diversity of outputs
- To move away from **inappropriate uses** of journal- and publication-based metrics
 - ✓ Rewards quantity and publication venue rather than quality; does not reward sharing, collaboration and outputs other than publications
- To further support the **quality of research** and the **attractiveness of research environments**
 - ✓ Requires a system and cultural change, involving institutions, funders and researchers

Political context

- **Sep 2020** - **Commission Communication on ERA** proposed to improve the research assessment system
- **Council Conclusions on ERA - Dec 2020** - and on research careers - **May 2021** - invited the Commission to work with stakeholders to effect change
