Жан Моне в сфері вищої освіти (Jean Monnet Actions in the Field of Higher Education)

Jean Monnet Actions in Higher Education **support teaching and research in the field of European Union studies worldwide.**

EUROPEAN UNION studies refer to the teaching, learning and research about the European Union, its history, aims, structures, functions and/or its policies.

By focussing on the European Union dimension, Jean Monnet activities should promote active European citizenship and the foundational values of the European Union: respect for human dignity, freedom, democracy, equality, rule of law and respect for human rights, including the rights of persons belonging to minorities (Article 2 of the Treaty on European Union 439)

Jean Monnet actions contribute to boost the offer of teaching, learning and research on Science, Technology, Engineering and Maths (STEM) with linkages to the related European Union policies.

Teaching hours are taken to include direct contact hours in the context of group lectures, seminars and tutorials and may include any of the aforementioned in a distance learning format, but do not include individual instruction and/or supervision. For Modules, summer courses are eligible.
